

THE WORLD'S FIRST CONNECTED MOTORCYCLE

ZERO MOTORCYCLES - THE CHALLENGE

Creating a one-of-a-kind powerful motorcycle with real-time two-way connection and advanced control capabilities.

Creating a solution that would allow "Effortless Connection", in which the bike communicates data such as stats, charging status, available range, bike tampering, new system updates and more.

STARCOM SYSTEMS - THE CONNECTED SOLUTION

Co-creating the first smart connected motorcycle, using Starcom's cellular connectivity.

BIKE DATA:

Bike status, charging status, available range, charging completed.

LOCATION INFORMATION:

Find my bike, Bike tampering.

RIDE & SHARE:

Mapped speed, power, torque, lean angles

BIKE ECU UPDATE OVER THE AIR!

Updates and more special features upon customer request.

CHARGING:

Charging schedule, target, setting, monitoring, alerts.

THE FEATURES

Starcom's Helios systems customized for Zero Motorcycles.

The technology is used in Zero's Cypher III operating system of the SR/F motorcycle.
